

Project Title: Pet Store Management System (SQL Server)

Project Summary:

This project is a relational database system designed using SQL Server to manage a pet store's operations efficiently. It includes multiple interconnected tables such as **Customers, Pets, Employees, and Orders** to simulate real-world business transactions.

The system tracks customer purchases, employee involvement in orders, and pet sales details using proper **Primary Key and Foreign Key relationships** to maintain data integrity.

Various SQL operations were implemented, including **JOINS, GROUP BY, aggregate functions, subqueries, window functions, views, stored procedures, and triggers** to perform advanced data analysis and reporting.

- a) Customers (customer_id, customer_name, phone)
 - b) Pets (pet_id, pet_name, category, price)
 - c) Employee (emp_id, emp_name, salary, designation)
 - d) Orders (order_id, customer_id, pet_id, emp_id, order_date, amount)
- Designed relational database using SQL Server
 - Created relationships using Primary and Foreign Keys
 - Performed data analysis using SQL queries
 - Implemented JOINS, GROUP BY, subqueries, and window functions
 - Generated business reports like sales and employee performance

The project generates meaningful business insights such as:

- Total orders placed by customers
- Employee performance based on order handling
- Revenue analysis and sales reports
- Highest and lowest salary analysis
- Monthly order trends

This project demonstrates strong understanding of **SQL database design, data manipulation, and reporting techniques**, making it suitable for entry-level **SQL Developer / Data Analyst** roles.

Project Over View :

Employee Table

	emp_id	emp_name	designation	salary	manager_id
1	1	Priya	HR Executive	22000	NULL
2	2	Rahul	Accountant	60000	1
3	3	Rahul	Receptionist	20000	1
4	4	Rahul	Store Supervisor	32000	1
5	5	Neha	Marketing Executive	27000	2
6	6	Vikas	Sales Executive	26000	2
7	7	Anjali	Customer Support	24000	4
8	8	Akash	Store Manager	38000	4
9	9	Pooja	Data Entry Operator	21000	4
10	10	Rohit	Inventory Executive	29000	4

Pets Table :

	pet_id	pet_name	pet_type	breed	age	price
1	1	Max	Dog	Pug	2	12000.00
2	2	Kitty	Cat	Siamese	1	9000.00
3	3	Coco	Bird	Cockatiel	2	3500.00
4	4	Charlie	Dog	Beagle	3	18000.00
5	5	Bunny	Rabbit	Dutch Rabbit	1	4500.00
6	6	Leo	Dog	Golden Retriever	2	22000.00
7	7	Simba	Cat	Maine Coon	2	15000.00
8	8	Tweety	Bird	Canary	1	2500.00
9	9	Jack	Dog	Rottweiler	4	30000.00
10	10	Daisy	Rabbit	Lionhead	1	5500.00

Customers Table :

	customer_id	customer_name	phone	city
1	1	Vikas Gaikwad	9876543214	Pune
2	2	Rohan Deshmukh	9876543215	Nashik
3	3	Anjali Kulkarni	9876543216	Kolhapur
4	4	Karan Singh	9876543217	Bangalore
5	5	Neha Gupta	9876543218	Hyderabad
6	6	Suresh Yadav	9876543219	Chennai
7	7	Pooja Mehta	9876543220	Ahmedabad
8	8	Arjun Patel	9876543221	Surat
9	9	Meera Shah	9876543222	Jaipur
10	10	Akash Kumar	9876543223	Indore

Orders Table :

	order_id	customer_id	order_date	pet_id	emp_id
1	1	1	2026-05-16	1	2
2	2	2	2026-05-16	2	4
3	3	3	2026-05-17	3	1
4	4	4	2026-05-17	4	3
5	5	5	2026-05-18	5	2
6	6	6	2026-05-18	6	4
7	7	7	2026-05-19	7	1
8	8	8	2026-05-19	8	3
9	9	9	2026-05-20	9	2
10	10	10	2026-05-20	10	4

Technologies Used:

- SQL Server (SSMS)
- SQL (DDL, DML, Joins, Subqueries, Window Functions).

Description Of this Project

This project demonstrates strong SQL skills in database design, data analysis, and reporting for real-world business scenarios.
